DESIGN STUDIO

THE TEAM

We are a Singapore-based studio that includes architects, interior designers, object and furniture designers. The leadership and core team work across all projects to ensure a high level of quality is achieved from concept design to implementation; we strongly believe in cross-pollination between the different faculties within the studio. Through internal review and collaboration, we challenge convention and seek new solutions to create inspiring outcomes within the luxury and lifestyle hospitality sectors. We are not merely an architecture firm with an interiors department or an interior design firm seeking to add architecture to our portfolio... our office was founded on the shared belief that the approach to both aspects must be with equal competency.

Maintaining a boutique-size studio of highly skilled, focused and creative individuals is key to Unscripted's core philosophy and we are mindful and selective in our review of potential collaborations, these projects are often exceptional in nature, character and location. We believe it is our fundamental role as designers to uncover the heart and soul of each project.

Our passion and dedication is unwavering and we collaborate closely with our Clients and the Brand, setting new benchmarks. We conceive purpose-built spaces that tell their own stories in the interplay of light, materials, space and movement - moments of serendipitous discovery and sustained delight that come together so naturally, it could only have been by design.
